2. Palm Oil and Certified Sustainable Palm Oil Use

2.1 Please include details of all operations using palm oil, owned and/or managed by the member and/or all entities that belong to the group.

The warehouse lead receives RSPO palm oil and marks down quantity and RSPO number of the supplier of a Receiving Record. Only RSPO palm oil is allowed in our facility. The palm oil is then stored in a cooler at a stable temperature of 3°C. Before it is needed on the production floor, one skid is held at room temperature for about a couple of days so the palm oil tank can work at its best. Line Leaders load the palm oil tank with palm oil. From there, it floats into a heated pipe (23°C) to our mixing bowl where it mixes with the other ingredients.
